

HerbaSalm

Nature's approach to support
GUT HEALTH
of animals

Traditional essential oils for welfare of animals and humans

There is still a large scale of antibiotic use in poultry rearing all over the world.

Let's change this mode of action and follow traditional medicine known in humans for centuries. Let's support health in animals to get healthy food for ourselves.

Today's poultry production requires a new approach to improve health and performance of animals. Stress factors such as change of diet, challenging environmental conditions or housing can lead to decreased appetite, suboptimal digestion and poor utilization of nutrients, subsequently causing an imbalance of the gut micro flora. A well balanced gut micro flora is a key factor to protect animals against enteric diseases and thus securing health and leading to positive effects in performance.

HerbaSalm® is a powerful combination of carefully selected essential oils well-known for their antimicrobial activity against different pathogenic micro organisms.

- 100% natural compounds
- No risk of residues
- Unique combination of ingredients
- No withdrawal period

HerbaSalm® with its essential oils support gut health through different pathways:

DIGESTION

- Maximizing nutrient utilization to reduce substrate for bacteria
- Supporting epithelial and villi growth and development

GUT MODULATION

- Balancing micro flora population in favour of beneficial bacteria
- Preventing pathogenic bacterial overgrowth

PHYSICAL BARRIER

- Supporting gut wall integrity
- Preventing adhesion of pathogenic bacteria

IMMUNITY

- maximizing the immune response acting as immune-suppressors or immune-potensors to support animal's own immune system

INSTRUCTIONS FOR USE:

Mix HerbaSalm® into drinking water in amount of 250 to 500 ml per 1.000 L. Prepare a fresh drink every day. Offer minimum 5 to 7 days consecutively. Repeat when necessary.

Application frequency in broiler chickens:

- 1. to 7. day • 14. to 21. day • 28. to 35. day, 5 to 7 days consecutively; Stop applying HerbaSalm® in time of vaccination.

Note: Mix HerbaSalm® into smaller amount of water and prepare a premix which is then dosed through the medicator into the watering system or mixed into a drinking water tank. Animals should always have fresh available. Keep your watering system clean and free of biofilm.

COMPOSITION:

Additives in 1 kg: Sensory additives: Mixture of natural essential oils of clove, thyme, oregano, cinnamon and rosemary, 175.000 mg;
Demineralized water as carrier.

Keep in an original packaging in cold and dry place, at temperature up to 25°C.

Shelf life is 12 months from date of production.

Packaging: 1L plastic bottle
